CHARLES J. GOULD, *Treasurer.*

We have examined the foregoing accounts of the Selectmen, Treasurer, Superintendent of Cemeteries and Overseers of the Poor of Plymouth for the year ending March 1st, 1887, and find them correctly cast and properly vouched.

FRANK W. RUSSELL, }
HIRAM CLARK, } *Auditors.*

BOARD OF HEALTH REPORT.

In the near future, a time to which some of us are likely to come, the skill and knowledge of medical men will be as persistently and earnestly devoted to the prevention of disease as they now are to its cure. In that coming good time when questioned as to the probable cause of some prevalent epidemic, it will not satisfy the intelligent querist, for the medical man to simply look wise, solemn and mysterious and attribute too much to an inscrutable visitation of Providence.

The researches of the painstaking investigators have given us sufficient data to warrant the conclusion that filth, living or dead, organic or inorganic, visible or invisible, solid, liquid or gaseous, and conveyed into the system through the medium of the food we eat, the water we drink and the air we breathe, is without doubt a prolific cause of preventable diseases, such as typhoid fever, diphtheria, malarial fevers, etc. Now if it is a fact, and we believe it is, that all zymotic and contagious diseases are propagated through the medium of air or water, besides being the medium for the transmission of the ova and embryos of the various parasites that infest and afflict the internal organs of man.

In view of these facts, how important that the attention of the public is called to the great importance of sanitary work in order to place our towns in the best possible condition to resist all preventable diseases. The surroundings of an individual always exert an influence for good or ill upon his health. A filthy, undrained soil always possesses a nest-egg for the inculcation of disease. The polluted soil poisons the air, renders wells unfit for use and sends its poisonous material into our dwellings and to places where our food and drinks are kept and if laden with disease germs is a factor in producing fatal disease.

The board of health should have the co-operation of all intelligent and good citizens to secure the best sanitary regulations in a community, for what will it avail individual effort if his neighbor, criminally indifferent, poisons the neighborhood?

The water supply for the town of Plymouth we believe is as pure and good as aqueduct water will average through the state.

Having occasion to investigate the water supply of the village in August last the Board of Health took water from a service water faucet in the village and sent it to the State Board of Health

for a chemical examination, and we beg leave to submit the conclusion of the report of the chemist:

EXPLANATION AND OPINION.

A yellowish color may result from vegetable matter, especially if decaying, or it may be due to iron. In this case it is due to iron. The small amount of free ammonia shows that decay is not going on in this water.

The albumoid ammonia is high for well water but quite low for aqueduct water. It shows that there is not a large amount of organic matter present for such water.

The low amount of chlorine, notwithstanding the trace of nitric acid, shows the absence of sewage and animal matter.

The trace of nitric acid is received from the atmosphere.

I believe this water is better than the average aqueduct water.

[Signed]

EDMOND R. ANGELL.

Derry, N. H., Aug. 27, 1886.

We would respectfully recommend to our successors that the water supply of the town be frequently examined for the purpose of determining its purity and secondly to note from time to time the elements that enter in to render it unhealthy as a beverage, so that it will be possible in time to determine the contaminating elements and intelligent action taken in the premises to render the source of water supply pure.

We can congratulate the citizens of Plymouth in the fact that we have not during the past year been visited by an epidemic disease. There has not been a case of scarlet fever or diphtheria reported to the health officers during the year, and of typhoid fever there has been four cases and each and every case, so far as our knowledge extends were upon investigation found to be imported from surrounding towns, only one being fatal.

Less complaints of excessive filth or of gross neglect on the part of tenants or house-holders have come before this Board than before our predecessors. Early in the summer a code of regulations, as specific as possible were prepared, which we claim if fairly tried will almost entirely do away with any of the common nuisances so often dangerous and always offensive.

In regard to the sewerage in the village district a few words may be in order. There was constructed in June '86 on Russell street a sewer of six and eight inches diameter, in length three

hundred and sixty feet. The cost of material amounted to about \$90.00 and of labor about \$70.00. One-half of the highway taxes in District No 2 was appropriated to the construction of sewers, amounting to eleven hundred dollars. July 7, '86 the Selectmen, upon petition of the Board of Health and others laid out a sewer from Langdon street, near Frank C. Calley's eastward across the Webster lot and through Cook place to Main street, which, when constructed, will be about twelve hundred feet long. An intercepting sewer has been planned of about one hundred feet in length across Main street near the south end of the common.

Respectfully Submitted,

TRISTRAM ROGERS,	} <i>Board</i>

	<i>Health.</i>

REPORT OF FIREWARDS.

PLYMOUTH VILLAGE FIRE DISTRICT FOR THE YEAR ENDING
MARCH 1, 1887.

To the Citizens of Plymouth Village Fire District. Gentlemen:—

Agreeably to the statute requirements, your Board of Firewards would respectfully submit the following brief report of its doings for the year past:

At the annual meeting held one year ago, the District made choice of Chauncey A. Fellows, Benjamin F. St. Clair and Joseph F. Wiggin, Firewards. Mr. Wiggin never qualified. The business engagements of the First Fireward were such that he felt compelled to call a special meeting of the District, among other things to receive his resignation and fill the two vacancies which would then exist. The special meeting was held July 3d, 1886. Mr. Fellows tendered his resignation, which was accepted, and Miron W. Hazeltine was chosen to fill the vacancy thus created, and John T. Cutter, Third Fireward, vice Mr. Wiggin.

CONTRACT.

In the fall of 1885, it will be remembered, a committee, consisting of Alvin Burleigh, Charles A. Jewell and Nathan H. Weeks, was appointed by the District to draft a new contract with the Plymouth Aqueduct and Water Company, the old one proving to be the cause of considerable friction between the two parties thereto. This draft was first submitted to the District at the special meeting spoken of above, and was, after discussion and one or two adjournments, ratified by the District, and the same Committee was authorized to enter into such an agreement with the said Plymouth Aqueduct and Water Company, through its agents. After some delay on the part of both parties the Committee notified the Board of Firewards that the new contract had been signed by the properly constituted officers of the Aqueduct and Water Company, but before they, (the committee,) signed it they desired an expression from the Board of Firewards on the advisability of their doing so, owing to the length of time that had elapsed. After some discussion consent was granted, though the Board was of the opinion that no such action on its part was necessary, as the District had not limited the time in which the com-

mittee was to act. Accordingly, on September 15, 1886, the Board was further notified by the Committee that the contract was duly executed by both parties, and a copy of the same was placed in the hands of the Firewards, since when it has been entered upon the District's records. Your Committee on Contract will report more fully in regard to the features of that document. The District is to be congratulated on this peaceable solution of the difficulties which at one time threatened to end in a big lawsuit.

PAYMENTS.

In accordance with the provisions of the contract the Treasurer of the Firewards met the Treasurer of the Water Company on the fourth (4th) day of October, 1886, and paid the amount due the Water Company, being \$577.97. As the first payment under the new contract fell due January 1, 1886, and the second July 1, 1886, it became necessary to pay the Water Company eight months' interest on the first payment and three months' interest on the second payment. As under the contract the rent from July 1, 1886, to Jan. 1, 1887, became due on the latter date, and whereas no provision had been made by the District to meet it, the company, by its officers, waived its right of annulment of contract, and extended the time of payment to July 1st of the present year, provided interest is paid on the same from Jan. 1, 1887, to that time. The Firewards hold their written agreement to that effect. It will be seen, then, that next July there will be due the company the sum of \$685.13, \$675 rent and \$10.13 interest. Further, not only must this sum be provided for at the present time, but also the six months' rental due January 1, 1888.

WATER SUPPLY.

Almost immediately after the election of the present Board of Firewards, they proceeded to make an exhaustive survey of the new reservoir, that they might not only have a correct idea of it, but so as to enable your committee on contract to act intelligently. They found that while at the gate there was a depth of water of 12 feet, 2 inches, the average depth of the pond as ascertained by 44 soundings made over the body of the reservoir was 9 feet 2 inches, showing the bottom to be very nearly level. The dimensions of the pond, exclusive of a small portion next the road on the south side is 130 feet by 175 feet. At no time during the past

year has there been less than 10 feet of water at the outlet. Should the reservoir ever be drawn down to the four feet called for in the contract it would give an average of three feet over the body of the pond. Late last fall the water company raised the dam on the north side some three or four feet so that when full there will be at least 16 feet of water at the outlet. It must be further remembered that last summer the railroad folks were drawing from 30,000 to 40,000 gallons per day for use in their engines. This draft has since ceased, the railroad getting their water by other means. So far as human foresight and experience can plan for the future it would seem that all the provision possible against fires has been made. We confidently expect there will be no more trouble on that score.

FIRES.

While other places, both in and out of the State have met with most disastrous fires, it is a matter of profound thankfulness that we have been entirely exempt from anything of the kind. At the same time we have had several extremely narrow escapes from what might have been serious fires. There was one alarm of fire, caused by a chimney burning out, to which the fire company responded with such commendable alacrity as to be the cause of much favorable comment on the part of some, at least, of our most substantial citizens. We are confident our company is composed of as good material as any, and in case you shall be so unfortunate as to need their services they will not be found wanting. It is a curious circumstance that in nearly every place where a village like ours has been nearly annihilated by fire the published accounts close with the suggestive words, "they had no apparatus for the extinguishment of fires." In some cases in these towns, the insurance companies are refusing to take more risks at any rate. Prudence would seem to dictate that we continue our support to the fire department. So long as we have no fires it seems a somewhat costly luxury, and if we knew we were not to be so afflicted for a long series of years it might be well to dispense with it, but no such pleasing assurance is vouchsafed to us.

APPARATUS.

Nothing new has been provided for the very good reason we have had no means to do with. It has been a cause of no little

solicitude on the part of all connected with the department the helpless condition we would find ourselves placed in should there be any occasion for the use of the apparatus much of the time during the winter. It is all the company, with its present force, can do to properly man the hose carriage when there is no snow on the ground, and then only in the vicinity of Main street. On many of these stormy and windy winter days and nights it would be simply impossible to move that long-axled, narrow-wheeled hose carriage beyond the hose house doors. It was a mistake procuring such a carriage, but having it we must make the best of it. What we would suggest to our successors is the desirability of having a set of runners made, of suitable dimensions, for the reel to rest on, so as to make the hose and other appurtenances available for use in the quickest possible manner in case of an emergency. The cost cannot be otherwise than small. We hope to see this accomplished in season for the snows of another winter. Early in the year we had the engine thoroughly overhauled and repaired. The apparatus generally is in good condition, other than the ladders, procured a few years since. We are very sorry to say they are badly powder-posted. Your Board understands the worm which causes the mischief commenced operations almost as soon as they were procured, although they were thoroughly painted. We doubt somewhat whether they would stand the strain required of them if called into practical use.

HYDRANTS.

The hydrants have remained in most excellent condition. They have been frequently examined. We must say that, after considerable observation and inquiry, we have no faith in the efficiency of banking them as a preventive of freezing. To all appearances it is time and money thrown away. If they will freeze without banking, they certainly will with. We banked some of them last fall because it has been customary so to do, but we recommend a discontinuance of the custom. There are at present twenty-seven.

ESTIMATES.

Your Board respectfully submit the following estimate of the amount necessary to meet the expenses of the next year. For rent of hydrants \$1022.63 as follows:

6 mos. rent to Jan. 1, 1887,

\$337 50

Interest on same 6 mos.,	10 13
6 mos. rent to July 1, 1887,	337 50
" " " " Jan. 1, 1888,	337 50
	<hr/>
	\$1,022 63
M. E. Society, ground rent to Jan. '88,	20 00
Incidental expenses to March 1, 1888,	100 00
	<hr/>
Total,	\$1,142 63

It will be seen that this sum provides for eighteen months' rent. This once paid it will not be necessary another year to raise so large a sum by about \$350. As there is no statute provision whereby the District can incur debts, it becomes absolutely necessary for the District to meet its obligations as they become due.

CONCLUSION.

In conclusion, gentlemen, we have only this to say. We have managed the affairs of the District with as much frugality as possible. Unlike the custom for several years back no officer of the District has made any charge for his services. Appended to this report is the schedule of the property of this District and the financial statement. We deem it but proper to explain the difference in the schedule of the District's property as returned by us this year, and that returned one year ago. At that time the Firewards returned as District property a long list of articles which belong to either the hose company or its individual members, property which the District does not own and never did.

DISTRICT PROPERTY.

- 1 two-story hose-house.
- 2 two-wheeled hose carriage with fixtures.
- 1 hand fire engine.
- 900 feet fabric hose with couplings.
- 104 " leather " " "
- 250 " 1½ inch rubber hose with couplings.
- 50 " 2 " " suction hose.
- 100 " 1 " " hose with couplings.
- 2 flexible leather discharge pipe with nozzles.

1 fabric discharge pipe with stop.
 1 brass " " for $1\frac{1}{2}$ inch hose.
 30 rubber fire buckets, nearly worth less.
 3 hydrant gates.
 4 " wrenches.
 4 hose jackets.
 2 rubber coats and one rubber cap.
 1 reducer.
 5 fireward's badges.
 10 hose spanners.
 5 ladders.
 1 parlor stove and fixtures.
 22 wood chairs.
 1 table.
 1 table lamp.
 2 double hanging lamps.
 1 bracket lamp.
 2 hydrants, one perfect, one useless.
 1 box stove and fixtures.
 1 hammer.
 $\frac{1}{4}$ cord wood,
 1 record book.
 1 oil can.

TOWN MEETING WARRANT.

STATE OF NEW HAMPSHIRE.

{  } To the Inhabitants of Plymouth in the County of
 { L. S. } Grafton in said state, qualified to vote in Town affairs.
 {  } You are hereby notified to meet at the Town Hall in
 said Plymouth on Tuesday, the eighth day of March next, at nine
 of the clock in the forenoon, to act upon the following subjects:

- 1.—To choose a moderator to preside in said meeting.
- 2.—To choose all necessary Town Officers for the year ensuing.
- 3.—To raise such sums of money as may be necessary to defray town charges for the ensuing year, and make appropriation of the same.
- 4.—To see if the Town will vote to discontinue the highway from S. M. Morse's east line by Joseph A. Bartlett's to the end of the road.
- 5.—To see what sum of money the Town will vote to pay firemen.
- 6.—To see what sum of money the Town will vote to raise to decorate soldiers' graves.
- 7.—To see if the Town will vote to raise money for the Library Association to buy an Encyclopedia and how much.
- 8.—To see if the Town will vote to raise the highway tax in money and how much, and in what way it shall be expended.
- 9.—To see if the Town will vote to exempt J. E. Chapman's machinery and stock-in-trade from taxation for ten years.
- 10.—To see if the Town will vote to exempt from taxation for a term of ten years the Granite State Glove Company and the buildings they may occupy for manufacturing if they should locate here.
- 11.—To see what action the Town will take in regard to building a hall in connection with the County and Court House, if such an arrangement can be made.
- 12.—To see how much money the Town will raise for the purpose of lighting streets.
- 13.—To see if the Town will authorize the Selectmen to borrow money to pay the debts of the Town and give notes for the same.

14.—To see if the Town will vote to raise money to buy a pair of harnesses to be used with Town hearse.

Given under our hands and seal this nineteenth day of February, in the year of our Lord eighteen hundred and eighty-seven.
